ELM MICROGRID ACHIEVES ISO 27001:2022 CERTIFICATION, STRENGTHENING COMMITMENT TO INFORMATION SECURITY

The Colony, TX — February 2, 2026 — ELM MicroGrid announced today that it has achieved ISO 27001:2022 certification, an internationally recognized standard for information security management systems (ISMS). This certification validates ELM MicroGrid's comprehensive approach to securing business, customer, and employee information across all company operations.

The certification applies to ELM MicroGrid's integrated management system supporting the design, production, delivery, and servicing of Battery Energy Storage Systems (BESS). ISO 27001:2022 certification demonstrates that ELM MicroGrid has implemented rigorous controls and best practices to identify, manage, and reduce information security risks.

"Achieving ISO 27001:2022 certification underscores our unwavering commitment to protecting the data entrusted to us by our customers and partners," said Jason Petermeier, ELM MicroGrid COO. "As the energy industry becomes increasingly digital, maintaining the highest standards of cybersecurity is essential. This milestone reflects our investment in secure technologies, disciplined processes, and a culture of continuous improvement."

By achieving ISO 27001:2022 certification, ELM MicroGrid further strengthens its position as a trusted provider of advanced microgrid and energy storage solutions, delivering innovation with security at the forefront.

###

ABOUT ELM MICROGRID

ELM MicroGrid delivers integrated, forward-thinking energy solutions designed to support resilient, reliable, and efficient power systems. ELM MicroGrid's Made-in-America solutions include advanced microgrid and control technologies—such as ELM FieldSight⌀ , our intelligent controller platform—that seamlessly integrate energy storage and distributed energy resources. With more than 300 deployments across the United States, Canada, the Caribbean, and beyond, ELM brings proven experience and reliability to complex energy environments.
